Subject: RE: SJRWP RI Report Table 5-9 Correction

Thanks, Gary. I know that was a tough meeting last night. I wish the public would listen more... They just don't have all the info and make assumptions about what EPA has control over, e.g. fish advisories, development on the south impoundment area, etc., etc. Hang in there.

If you could help me with something, I need to update the timeline on our webpage. It currently reads as follows:

- **Feasibility Study Report** – *This document is due from the potentially responsible parties to the EPA in December 2013. HARC review of this document to be completed in January 2014.*
- **EPA Proposed Plan for Clean Up of the Site** – *This document is due from the EPA in February 2014. HARC will review this document as soon as it is available. Please note that there will be a minimum 30-day formal public comment period on the EPA Proposed Plan.*

Can you let me know when the final FS is scheduled for release to us? Do you have an idea of the month that the Proposed Plan will be released?

Scott

Subject: FW: SJRWP RI Report Table 5-9 Correction

Scott,

Found error in the RI Report; this revised table corrects it.

Regards,

Gary Miller

Subject: SJRWP RI Report Table 5-9 Correction

Hi Gary-

Integral has investigated the question you had about the TEQ statistics for sediment presented in Table 5-9 of the May, 2013 Final Remedial Investigation Report, and have found the table to be in error. The error resulted from the analyst incorrectly substituting the "total dioxins and furans" in the last line of the table, instead of the "TEQ_{DF}" concentrations; we thoroughly checked the other tables in the report and do not expect this sort of problem elsewhere.

The error has been corrected, and the corrected table is attached. The corrected table has been inserted into the PDF of the report posted on the wiki, and the single page with only this table has also been posted for the convenience of others.

I will send you this table in hardcopy tomorrow.

I apologize for any confusion caused by this error.

CERCLA Docket 06-03-10.

Jennifer
